Item description

Cable assembly *WINSTA*® MINI rated current 10 A

The *WINSTA*® MINI cable assembly with protection type IP20 provides the foundation for installation of solid and fine-stranded conductors. WAGO pluggable installation connectors are useful when criteria repeat or are distributed on a specified pattern, for example for installing grid lighting or flush-mount lighting. The mechanical coding and color coding of the pluggable installation connector ensure error-free installation of the individual components – including protection against mismating. Solutions like the *WINSTA*® MINI pluggable installation connectors with B coding are suitable for applications related to process control, for example, for lighting or in data networks. Where space is tight, our smallest pluggable connection system, *WINSTA*® MINI, consistently displays its advantages. It is very compact, and, thanks to Push-in CAGE CLAMP® spring pressure connection technology, it additionally can be installed quickly, since the connection is low-maintenance and requires no screw connections. Building safety must be ensured at all times, even after the electrical installation stage. The mandatory safety requirements in connection with EU CPR are fully satisfied by this product through fire class E.

Pluggable connections instead of screw connections – cable assemblies from WAGO

The cable is pre-assembled with a plug and a free end. The WINSTA® Pluggable Connection System allows pluggable electrical installation. This saves time, lowers costs, and reduces the need for servicing. Take advantage of the pluggable version of our maintenance-free spring pressure connection technology too! Plan your installation with *WINSTA*® MINI pluggable installation connectors with protection type IP20 from WAGO.

- effective protection against mismating
- consistent IP40 protection
- with B coding for use in process automation, such as lighting technology
- exact dimensions
- rapid, structured electrical installation
