 Picture differs from the item.

This item has been discontinued and is no longer available as of 31.10.2014.

Item description

Compact and robust, the WAGO I/O-IPC-P14 is designed for general control applications. The high-performance IPC can fully perform controlling, monitoring and visualization tasks.

The I/O-IPC features a Pentium®M processor with 1.4 GHz and all standard PC interfaces (e.g., 2 x USB, RS-232, DVI-I and 2 x ETHERNET).

Depending on the application, WAGO I/O System's modules are connected to the I/O-IPC to suit the particular task. Two opto-isolated digital I/O (24VDC) are directly integrated for fast signal transmission.

With optional CANopen (CO-M) and PROFIBUS DP (PDP-M) fieldbuses in master version, the I/O-IPC may also function as a main PLC in industrial environments.

Using Linux® operating system and optional CODESYS PLC software, including CODESYS visualization, a stable and high-performance automation system featuring universal communication characteristics is available for long-term, reliable service.
