Item description

CODESYS is a programming and visualization tool for control programs.

With CODESYS version 3, users can develop PLC applications for the programmable fieldbus controller found in the WAGO SPEEDWAY 767 Series. CODESYS 3 works in accordance with IEC 61131-3 and supports IL, LD, FBD, ST and FC, all of which are programming languages of this standard.

With extensive programming functions, the software readily meets the increasing requirements of control program development (e.g., reusability and modularization).

- Programming of different control systems in one application
- Cross-communication between control systems
- Object-oriented extension of the IEC61131-3
- Integrated process visualization
- Additional high-performance CFC editor
